## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a pegboard hook, classified in class 248, subclass 220.31.
- II. Claims 12-20, drawn to a method, classified in class 29, subclass 432.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II as best understood are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method for using the pegboard hook having a single method step of "inserting a pegboard hook into a pegboard" as claimed can be practiced with another materially different product such as inserting a hanger of the pliable type such as a rope or a cable into the pegboard for supporting an object onto a pegboard.

A telephone call was made to Walter Tencza Jr. on September 13, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
